## EXPERIENCE

### Full Stack Developer

#### InfoDrive Solutions Sdn. Bhd

📅 March 2021 – Present

#### CMMS Application (working)

- A CMMS (Computerized Maintenance Management System) application streamlines maintenance operations by automating scheduling, tracking, and reporting of maintenance tasks. It enhances equipment reliability, reduces downtime, and ensures compliance with regulatory standards. The application allows users to manage work orders, inventory, and maintenance history efficiently. Features include real-time data access, preventive maintenance scheduling, and comprehensive analytics. Ideal for industries such as manufacturing, healthcare, and facilities management, a CMMS improves operational efficiency and extends the lifespan of assets, ensuring smooth and uninterrupted operations.
- Using React js to create UI Component
- Developed Admin Dashboard for Super admin and User
- Used React Js for UI and Php for backend Api with SQL Server for database
