

Omnichannel Customer Messaging, Simplified

Deliver the personalized messages your customers expect with powerful custom messaging tailored to your user journeys.

Mobile Push

In-App

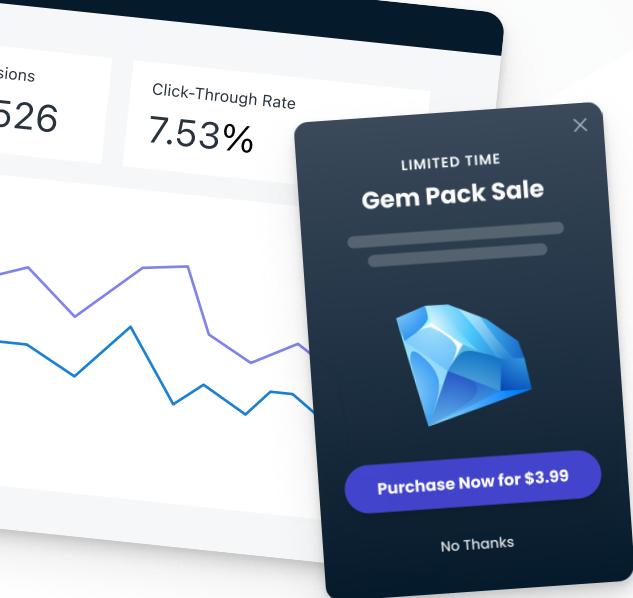

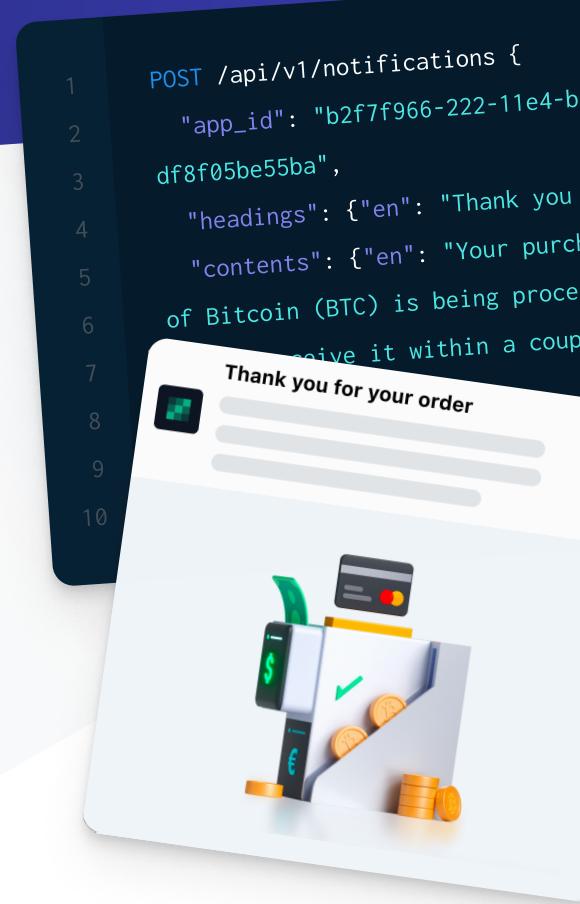

Email

SMS

Web Push

Quickly Decouple Engineer & Marketing Teams

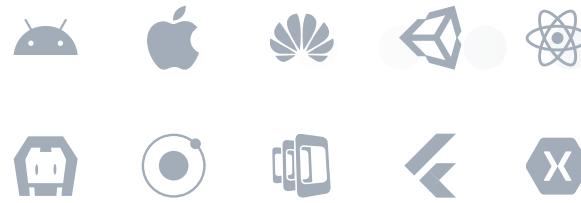

Save time and budget with our marketing-enablement SDK. Implement promotional In-App Messages without having to re-submit apps for review. Empower your business teams to manage the app's messaging.

Built for Speed, Scale, & Reliability

Built for speed and reliability using Rust, we're the fastest and most trusted messaging provider at scale. We deliver over 10 billion notifications a day with higher throughput than any other provider, and offer SLAs.

Best-in-Class SDKs & APIs

Implement push, SMS, In-App Messaging, and email across multiple platforms, including iOS, Web, Unity, and Android. 20+ high-quality SDKs and robust APIs enable engineers to quickly integrate OneSignal.

Why OneSignal?

onesignal.com

Messaging Without the Maintenance

We track platform changes so you don't have to scramble after every iOS and Android release. Target our API and take advantage of new platform benefits quickly.

Secure & Private

Our cloud-native implementation leverages the latest encryption methods for added security. We save only what you tag. Compliant with GDPR, CCPA & more.

Leading Integrations

Connect to top analytics, CMS, and eCommerce solutions including Amplitude, Mixpanel, Segment, HubSpot, Shopify, WordPress, and many more.

Developer Community & Documentation

Accessible community on Discord, GitHub, StackOverflow, YouTube, Twitter, Reddit and more. Easily find samples for your tech stack and engage with our developers.

Easy to Use

Developers get up and running quickly with just 10 lines of code. Marketers easily implement a multichannel messaging strategy with our intuitive dashboard, visual workflow builder, extensive documentation, and 24/7 support.
